1. ABSTRACT

The internship at Izeon Innovative pvt Ltd., Chennai aimed to provide practical experience in web development through the design and implementation of a Event Booking Web Application. To create a simple and responsive event booking platform where users can view upcoming events and book tickets by filling out a form. The goal is to demonstrate core front-end development skills.

The primary objective of the internship was to apply theoretical knowledge in a real-world project, understand the web development lifecycle, and gain hands-on experience with modern web technologies. The project was developed using HTML5, CSS3, JavaScript for responsive design. This Event Booking Platform displays a list of upcoming events with images, titles, and dates. Each event card has a "Book Now" button which opens a modal form. Users can enter their name and email to confirm their booking.

During the 1month internship, I was actively involved in requirement analysis, frontend design. This experience enhanced my technical knowledge, problem-solving abilities, and understanding of full-stack web development. Additionally, it improved my teamwork, communication, and documentation skills through collaboration with mentors and preparation of daily work reports.

In conclusion, the development of the Event Booking Web Application provided invaluable exposure to practical web development practices, bridging the gap between academic learning and real-world implementation. It strengthened my technical skills and prepared me for professional roles in the IT and web development industry.

2. PROJECT OVERVIEW

The **Event Booking Platform** is a front-end web application developed using **HTML, CSS, and JavaScript**. The primary goal of the project is to provide users with a simple and interactive interface to browse events and book tickets online. The platform emphasizes ease of use, responsive design, and real-time feedback through JavaScript alerts after successful bookings.

- ☐ To design a **user-friendly interface** for event discovery and booking.
- ☐ To implement **form validation and alerts** for immediate user feedback.
- ☐ To create a **responsive layout** that adapts to different devices.

□ To demonstrate the integration of **HTML structure, CSS styling, and JavaScript interactivity** in a real-world application.

3. MODULE DESCRIPTION

Module	Purpose
Homepage	Introduces the platform and showcases events
Booking	Allows users to select events and confirm bookings
Alert	Gives alerts after booking an event

4. PROJECT STRUCTURE

```
event-booking-platform/  
├── index.html    # Homepage  
├── event.html    # Event details page  
├── booking.html  # Booking form  
├── confirmation.html # Confirmation page  
├── CSS/  
│   ├── style.css  # Styling  
├── JS/  
│   └── script.js   # Interactivity & logic  
└── images/        # Event images & icons
```

5. FEATURES

- Homepage displaying upcoming events with images, descriptions, and dates.
- Event details page with information such as venue, time, and ticket price.
- Booking form where users enter their details and ticket preferences.
- JavaScript alert system that confirms booking instantly after submission.
- Responsive design using CSS Flexbox/Grid for mobile and desktop compatibility.
- Basic validation to ensure correct input (e.g., name, email, ticket count).

6. SOFTWARE REQUIREMENT

The Event Booking Platform is developed using basic web technologies such as HTML, CSS and Javascript, and is implemented using the **Visual Studio Code (VS Code) editor**. The system requires a computer running on Windows 10 or higher, macOS or Linux operating systems with at least an Intel i3 processor, 4GB of RAM, and sufficient storage space for development files. Visual Studio Code serves as the primary code editor, providing a user-friendly interface and extensions like Live Server, Prettier and Auto Rename tags to enhance coding efficiency and improve project management. The platform is designed to run on modern web browsers such as Google Chrome, Mozilla Firefox or Microsoft Edge which are required for testing and execution of the websites. The HTML5 language is used for creating the structure of the web pages, CSS3 is used for styling and designing an attractive user interface and Javascript (ES6) is used for adding interactivity, form validation and dynamic content management. Optionally, libraries such as Font Awesome can be used to improve the responsiveness and visual appearance of the platform. The project follows a simple folder structure consisting of separate directories for HTML pages, CSS files, Javascript files and images to ensure modularity and maintainability. Overall, the software requirements are lightweight, ensuring that the application can be developed and executed efficiently on any standard computer system.

7. HARDWARE REQUIREMENTS

- ☐ **Processor:** Intel Pentium IV or equivalent (1 GHz or higher)
- ☐ **RAM:** 2 GB
- ☐ **Hard Disk:** 2 GB free space (for project files, browser cache, and assets)
- ☐ **Display:** 1024 × 768 resolution monitor
- ☐ **Input Devices:** Standard keyboard and mouse
- ☐ **Network:** Basic internet connection (for testing and hosting)

systems like Windows, Android, iOS, or macOS, along with a reliable internet connection.

8. TECHNOLOGIES USED

a. HTML5 & CSS3

HTML5 (Hyper Text Markup Language) is used to structure the web pages by defining various elements such as headings, paragraphs, images, forms, and buttons. CSS3 (Cascading Style Sheets) is utilized to enhance the visual presentation of the webpages, including layout design, colour schemes, fonts, and responsiveness. Together, HTML5 and CSS3 provide a clean, responsive, and accessible user interface for the online travel agency system.

b. JAVASCRIPT

JavaScript is implemented to add interactivity and dynamic behaviour to the website. It allows for real-time form validation, interactive navigation menus, data manipulation, and smooth user interaction. Through JavaScript, the system enhances user experience by enabling dynamic content updates without reloading the entire page.

c. VS CODE / IDE

Visual Studio Code (VS Code) is used as the primary Integrated Development Environment (IDE) for the development of the project. It provides features such as syntax highlighting, real-time error detection, code suggestions, and integrated version control. These features improve the efficiency of development and debugging processes.

13. OFFER LETTER

Date: June 19th 2025

Employee ID: 102IZEON619

Appointment Letter

Dear Akshaya.C

Thank you for the keen interest you have shown in our organization. Consequent to your application and the subsequent discussions you had with us, we are pleased to appoint you as **FULL STACK INTERN AT IZEON INNOVATIVE PVT LTD**. We appreciate your entrepreneurial instincts and welcome your decision to join this organization. We are sure that not only will you contribute in your field of expertise but also help build this organization to be a Global Player. In doing so, together we will preserve the Core Values that we stand for.

You are requested to contact **HR TEAM** to take on your assignment on **19th June 2025**

In case you need any further clarification / assistance, please get in touch with the under signed.

Please sign and return a copy of this letter to the undersigned at the earliest. Looking forward to your joining our "Winning Team".

Thanks, and regards,

BAVYA S

Senior Manager – HR Recruitment

I accept this appointment and the terms and conditions.

(Signature of the candidate)

IZEON INNOVATIVE

No: 66 3rd Floor City Centre Thirumalai Pillai Road T Nagar Chennai – 600017

CONFIRMATION MAIL

Dear Akshaya C

We want to welcome you to Izeon Innovative Pvt Ltd You are about to begin one of the most exciting times in your life, and everyone in our Team wants to help you make your "Izeon Experience" is a safe one. You are selected in interview process, you are appointed as are FULL STACK DEVELOPMENT INTERN AT IZEON INNOVATIVE PRIVATE LIMITED" Training will be start on JUNE 20th

You often hear that Izeon is a special place, and it is! Its depth of character, traditions, diversity, commitment to academic excellence, as well as its beautiful natural surroundings contribute to making Izeon such an exemplary academic environment in doing so, we encourage you to take appropriate personal and collective precautions when living, learning, and working at Izeon.

we look forward to your joining our organization on june 20th . please confirm your date of joining in return mail with your acceptance.

we are here to help you, at all times 24 hours a day, 7 days a week. you will see us around as you enjoy the campus.

NOTE: Updated Marksheets, Photo Copies, ID proof, Passport Size photos...

14. CERTIFICATION

Date: 24-07-2025

Internship Certificate

This is to certify that **AKSHAYA C (Reg:950622106004)** is pursuing **3rd year B.E (ECE)** from **EINSTEIN COLLEGE OF ENGINEERING**. She has completed **30 Days of Internship as PYTHON FULL STACK DEVELOPMENT** at our **IZEON INNOVATIVE PVT LTD** from **24-06-2025 to 24-07-2025**, during the period of Internship.

We congratulate you on presence with us during this period completed **EVENT BOOKING PLATFORM** We are confident that your contribution will take us further in our journey towards becoming world leaders. We assure you of your support for your professional development and growth.

We wish you all the best for your upcoming career.

For IZEON INNOVATIVE PVT LTD,

Authorized Signatory.

15. CONCLUSION:

During my one-month internship at **Izeon Innovative Private Limited**, I had the opportunity to apply my knowledge of **HTML, CSS, and JavaScript** in developing a functional **Event Booking Platform**. This project allowed me to gain practical exposure to front-end web development, focusing on creating responsive layouts, designing user-friendly interfaces, and implementing interactive features such as booking alerts.

The internship experience not only enhanced my technical skills but also improved my ability to work within structured project timelines and follow professional development practices. By building this platform, I learned how to integrate design and functionality to deliver a smooth user experience, while also understanding the importance of validation, responsiveness, and real-time feedback in web applications.

In conclusion, the project reflects the knowledge and skills I acquired during the internship and demonstrates my ability to translate theoretical concepts into a working application. It serves as a strong foundation for future learning in advanced web technologies and provides valuable experience that will support my career growth in the field of web development.
